

## ***MedEdPORTAL*® Call for Submissions: Anti-racism in Medicine**

*MedEdPORTAL* is an open-access journal of teaching and learning resources in the health professions published by the Association of American Medical Colleges and in partnership with the American Dental Education Association. *MedEdPORTAL* actively encourages educators across the health professions to submit generalizable educational materials with a focus on anti-racism for inclusion in a new collection.

As a journal of health professions educational resources, it is our responsibility to name racism as a barrier to equity and to work toward dismantling systems of oppression within our profession through training and education.

The new *MedEdPORTAL* [Anti-racism in Medicine Collection](#) provides educators with practice-based, peer-reviewed resources to teach anti-racist knowledge and clinical skills, elevates the educational scholarship of anti-racist curricula, and aims to convene a community of collaborators dedicated to the elimination of racism within medical education. To specifically support developers of and educators in anti-racist curricula, we also offer individualized mentorship for potential authors.

*MedEdPORTAL* invites authors, owners and contributors to submit their works for publication consideration. We seek teaching activities and assessment approaches directly related to:

- Racism
- Microaggressions
- Trauma-informed care
- Implicit bias, health disparities, and/or social determinants of health where racism is a significant component

*MedEdPORTAL* publications are stand-alone, complete teaching or learning modules that have been implemented and evaluated with medical or dental trainees or practitioners. Each submission is reviewed by editorial staff and external peer reviewers using a standardized review instrument grounded in the tenets of educational scholarship.

For full submission guidelines to *MedEdPORTAL*, please visit [www.mededportal.org/author](http://www.mededportal.org/author).

All submissions in these topics that successfully pass the peer review process will be published in *MedEdPORTAL* and searchable via PubMed and MEDLINE.
